

2024 | UF/IFAS EXTENSION IMPACTS AND BUDGET

ANNUAL REPORT

EXTENSION CONNECTIONS

To meet the needs of Florida’s citizens, UF/IFAS Extension uses a wide range of methods to deliver educational information. In 2024, state and county faculty responded to more than 2 million citizen requests on an individual basis and through group educational events. In addition to these personal contacts, faculty also distributed research-based materials and used the Internet and other mass media to reach clientele at record rates.

VALUE OF VOLUNTEERS

A key component to achieving the UF/IFAS mission is the contribution of volunteers. In 2024, nearly 21,000 volunteers donated the equivalent of \$25.7 million in services or volunteer time¹. Using our successful volunteer programs, UF/IFAS Extension is able to provide services to communities that ordinarily could not afford them.

CUSTOMER SATISFACTION

As part of our annual evaluation and accountability process, UF/IFAS Extension conducts a scientifically based “Client Experience Survey,” allowing the people we serve to judge our performance. In 2023, 11 Florida counties asked their clientele if the information we provided was up-to-date, delivered in time to meet their needs, relevant to their situation, and easy to understand. In addition, clientele were asked if they used the information and if it solved their problems or met their needs. For those who did not use the information, it was found that other factors prevented them from using it.

CLIENTELE OUTCOMES

In 2017, UF/IFAS Extension created statewide measures to better track our performance. One area with big impact is water conservation. UF/IFAS Extension’s Florida-Friendly Landscaping™ (FFL) program and the Center for Land Use Efficiency (CLUE) partner with state agencies, local governments, and nonprofit organizations to safeguard our water for future generations.

EXTENSION FUNDING

UF/IFAS Extension receives the majority of its funding through state and local governments. In 2024-25, 75.5% of the \$152.9 million budget was received from state and county governments.

STATE FACULTY BY PROGRAM AREA

State Extension faculty work with UF/IFAS researchers and county faculty to deliver new information and technology to assist Florida residents in solving problems.

COUNTY FACULTY BY PROGRAM AREA

County faculty develop and deliver programs to Florida citizens based on input from local advisory committees, county commissioners and volunteers in collaboration with state faculty.
